## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 6,070,106 to Hall.

Hall discloses a cable driver modular motion unit for effecting one axis of motion of a multi-axis positioning device, comprising: a base structure 43; a linear guide attached to the base structure, the linear guide having a major axis aligned with the one axis of motion; a carriage 45 arranged on the linear guide such that motion of the carriage is limited to being along the major axis; a drive motor 30 attached to the base structure 43; and a cable 13 attached to the carriage and the drive motor such that rotation of the drive motor causes movement of the carriage, wherein, during operation of the multi-axis positioning device, the cable moves independently of any portion of the multi-axis positioning device that moves in an axis of motion other than the one axis of motion.

With respect to claims 13-19, the method described in these claims would inherently result from the use of the positioning apparatus of Hall.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
